Class of the Week

12TF

Congratulation!

Last week we were delighted to have a visit from our local MP, Florence Eshalomi. She met many of the children and showed a great interest in their work. Several students were able to talk to her about the tasks they were engaged in. Daniel, our Head Boy and Tamara, our Deputy Head Girl,

talked about their Maths work and how they have been looking at the value of different coins. Daniel stated that this will really help them when they are out in the community in local shops. Florence also spent time in Art and asked for students to create some art work for her office in Parliament. She also promised us the opportunity to visit her at the House of Commons in the future. Thank you Florence, it was great to meet you!

Mr Jukes

where we were

Last Friday the students from 13AM went on a trip to see the Arsenal Emirates Stadium. They planned this trip as part of this term's topic "Using Transport". The pupils researched how they could travel to Arsenal and what is the best route to get there.

As the biggest fans of Arsenal at school, they looked at the stadium, popped into the shop and visited the Arsenal museum. They saw a collection of shirts, shoes, footballs, medals and trophies.

The trip was great. The students were tired, though they were all keen to practise their independent travelling skills every week!

what we learned science

This term, Year 9 explore the "States of Matter". In this scientific experiment with 9NT we produced CO₂ in a gas form inside a liquid solvent (oil). The students learnt that if we mix a solid and a liquid together we can produce a gas (solid + liquid → gas).

This was the 4th scientific experiment about the States of Matter and definitely such a fun one; the students were thrilled with the form of the produced CO₂ which looked like "green lava".

After School Clubs

Tuesday

Football
