

# LANSDOWNE SCHOOL NEWSLETTER

During a normal academic year, we provide work experience placements for many of our students through a charity called Spark! For obvious reasons the placements have not happened over the last year but Spark! provided us with

many virtual events. This week

they gave us a virtual workshop on skills we learn at school that we can carry forward into a work situation. The focus was on Year 10 this week and the skills included speaking clearly, good listening, problem solving, creativity, staying positive, aiming high, leadership and teamwork. Well done Year 10 for being so focused in the workshops!

Mr Jukes

## *school Library*

We are hoping to open the school library soon. Zachy chose one of our new books to read.

He was able to talk about the front cover and the spiders on it. He told us the name of the book, 'Freaky Families'. He liked the picture of the girl on the cover and was able to say that the book would be about spiders' webs and a strange family. He read some of the book and enjoyed it. Well done Zachy!

# what we learned this week

## Humanities

This term year 9 have been learning about the early railways in Britain. 9A this week made their own railway lines and then a 3D model of a railway.
