

# LANSDOWNE SCHOOL NEWSLETTER

In collaboration with Spiral, a local organisation which provides careers services, we are introducing pilot weekly workshops to support our students build vital independence and employability skills. In accordance with all the measures in place to prevent the spread and infection of COVID-19, we welcome three members of Spiral who use their experience and enthusiasm to accommodate activities related to team building, communication and self-awareness. The students responded extremely positively to our external partners and were engaged in all the activities.

We are looking forward to the next sessions and hope that this partnership will continue to develop in the future.

Mr Anatoliotis

Our Year 13 students meet every two weeks with their mentor, Richard, to discuss their transition to their future provision. Some of our students who are about to leave Lansdowne this year will either continue their studies in local colleges, will follow an apprenticeship programme or follow a job pathway. Richard works with us to ensure that our young people as well as their families receive the appropriate support so their transition happens in a smooth way.

## Making a window display for The Department Store

We are very excited to announce that we will be making another window display for The Department Store. Squire and Partners have asked Lansdowne School to help them create a wonderful display on the theme of 'Care'. Key Stage Three have been thinking about who cares for us, who we care for and the importance of self care. Students and teachers from our school have contributed our words, drawings and ideas. These will then be printed onto colourful paper and made into a 3D display of the word care. The paper for this display is also very special - it is a seed paper which when recycled will grow into plants.
